Pinot Noir Rosé – ORGANIC

Our Organic wines are made in accordance with principles of organic farming, which excludes the use of artificial chemical fertilizers, pesticides, or herbicides. The goal is to produce quality wines and valuing the expression of one's terroir, promoting positive interactions between soil, climate and plants. The organic approach is the logical outcome of a process of environmental protection, appreciation of the capacity of the terroir and the development of a very typical product.

Tasting notes

The first impression this wine delivers is the surprising one of relating more to a white than a rosé. The bouquet offers up notes of crushed strawberries, sweet spices, very floral notes of violet and hawthorn. The mouth is very powerful and generous, the grain is velvety and with a revitalizing freshness. The wine is built on tension and stamped with a brilliant salinity.

Food and wine pairing

Match really well with light salads, light pasta and rice dishes, especially with seafood, raw and lightly cooked shellfish and grilled fish and goats' cheeses. Perfect hot weather drinking.
